

Name: _____

Period: _____ Date: _____

Animal Scavenger Hunt

There are 11 posters up in the room, one for each of the major animal phyla we are studying. Your mission is to figure out who these critters are! For each animal listed, you will receive 1 pt. if you can identify it to the Class level, 2 pts. if you can come up with the correct Order, 3 pts. if you get to the right Family, and 4 pts. if you can take it to the Genus/Species level.

You can use *any* resource: the internet, encyclopedias, field guides, identification books, your textbook, whatever you find helpful. (A number of the links listed below may be very helpful for this assignment!) The 11 posters from the room are also available on the web, so you may work on identifying these organisms in the library or at home also:
