Activities 5 & 7 - The Sun and the Stars

Apply

1. Name two ways we get benefits from the sun.

Name two ways the sun can cause problems for us on Earth.

2. Why is it important to track sunspot activity on the sun?

3. What causes the seasons?

Why is it warmer in the summer and colder in the winter?

4. Name two ways one star can appear brighter than another star.

5. Describe a star's life cycle (birth, life, death). Be sure to describe how the life and death occur depending on a sun's mass.
